Yukon Student Profile

A Research Paper

June, 1989

The Yukon Government
Executive Council Office
Bureau of Statistics
Whitehorse, Yukon

FOREWORD

The Bureau of Statistics was asked to assist the Department of Education in the design of a standardized enrollment form and corresponding data entry system for collecting pertinent demographic information on Yukon students. One of the products of this project was the creation of a student demographic profile.

The student profile portrays a demographic picture as of December 1988. The total Yukon enrollment was 5,133 students, 2,689 male and 2,444 female, which follows quite closely to the Yukon Health Care population numbers. It also follows the enrollment figures shown in the Education annual report very closely.

This was the second time a virtual census of students in the Yukon has been done. The experience gathered to date with the registration will ensure more comprehensive coverage for all information in the future.
